SUMMARY

I'm a Full-Stack Developer with experience building scalable web applications and user-focused interfaces. I mainly work with React and Next.js to develop clean, responsive frontends, and I also handle backend tasks such as API integration and data management to support complete features. I've worked on building real-world projects from scratch, focusing on performance, usability, and maintaining clean, organized code. I enjoy solving problems and turning ideas into practical, working solutions that deliver a smooth user experience.

SKILLS

Frontend Technologies: React.js · Next.js · TypeScript · JavaScript · HTML5 · CSS3 · Tailwind CSS · Framer Motion

Development Practices & Tools: Responsive Design · API Integration (RESTful) · State Management · Component-Based Architecture · UI/UX Principles · Performance Optimization · Cross-Browser Compatibility · Git · Version Control · Agile Methodologies

Backend & Database Concepts: Node.js · MongoDB · JWT Authentication · Cloud Storage (S3-compatible)

EXPERIENCE

OnlyFounders by Founders Hub Network

Remote

Frontend Developer

Jun 2025 - Nov 2025

- Led the frontend development of a Web3 MVP, building a user-centric interface for interacting with blockchain-based systems.
- Focused on handling real-time on-chain data and enabling multi-wallet connectivity, allowing users to interact with smart contracts in a seamless way.
- Translated complex blockchain logic into an intuitive user experience using React and Next.js, while ensuring performance and responsiveness across the application.
- Architected a scalable frontend using TypeScript, Tailwind CSS, and Zustand, collaborating closely with blockchain engineers to align smart contract logic with frontend behavior and deliver a fully integrated product.

Arcanys

Remote

Frontend Developer

May 2022 - Apr 2024

- Developed and maintained robust frontend features across different web projects, crafting user interfaces using React and Next.js, and contributing to critical application screens and landing pages.
- Focused on creating responsive layouts, structuring reusable components, and keeping the UI clean and maintainable.
- Executed seamless integration of RESTful APIs, connecting the frontend with backend services to ensure accurate data flow and expected feature functionality.
- Collaborated effectively with cross-functional teams within an Agile development environment to deliver and continuously improve project features.

Elsina3ya - Content Creator & Influencer Management Platform

Remote

Freelance Frontend Developer

Dec 2025 - Feb 2026

- Designed and developed a corporate website for a content creator and influencer management agency using Next.js, featuring an Arabic-first (RTL) layout and sophisticated dark theme with gradients.
- Implemented advanced UI/UX elements, including smooth scrolling (Lenis), interactive animations (Framer Motion), glassmorphism effects, and dynamic mobile navigation.

- Integrated a contact form with Resend API for reliable email delivery, enhancing client communication capabilities and showcasing comprehensive service offerings.
- Optimized for performance and user experience, effectively communicating company mission, values, and services for influencers and brands through a modern, engaging digital presence.

Omdah – Video Production Company Portfolio & CMS

Remote

Freelance Full-Stack Developer

Oct 2025 - Feb 2026

- Designed and developed a full-stack portfolio website and content management system (CMS) for a Saudi video production company, leveraging Next.js 15.
- Implemented a modern Arabic-first UI with full RTL support and a dynamic admin panel for managing content without code changes.
- Established secure authentication and comprehensive CRUD operations for projects, including video/image uploads to cloud storage (IDrive e2/S3-compatible) and seamless email handling.
- Delivered responsive, high-performance pages with integrated animations, optimized MongoDB database integration, and smooth video streaming for an enhanced user experience.

IEDAR - Architectural Design Company Website

Remote

Freelance Frontend Developer

Nov 2025 - Nov 2025

- Engineered a sophisticated portfolio website for an architectural design company, featuring a dark luxury theme and full Right-to-Left (RTL) Arabic support.
- Integrated advanced UI elements including parallax scrolling and interactive animations to create an immersive user experience.
- Ensured full responsiveness across all devices, showcasing project galleries and company narratives with a clean, modern UI.

Alpha Factory – Video Production Management System

Remote

Freelance Full-Stack Developer

Sep 2025 - Oct 2025

- Developed a comprehensive video production workflow system with multi-role access (clients, designers, editors, reviewers), significantly enhancing project management efficiency.
- Implemented automated invoicing, secure PayPal payment integration, and real-time notifications via Telegram bot and WhatsApp Business API.
- Integrated automated email reminders, voice recording tools, and video duration detection for streamlined operations and data management.
- Designed and built a full administrative panel for efficient account, project, and workflow management, demonstrating full-stack capabilities.

Coins Games

Remote

Freelance Frontend Developer

Mar 2025 - Oct 2025

- Crafted a high-performance, responsive user interface for a game currency marketplace, ensuring smooth interactions across desktop and mobile devices.
- Developed intuitive e-commerce interfaces, including dynamic hero banners, product cards, and subscription sections, enhancing browsing and purchase experiences.
- Implemented frontend architecture integrating with backend APIs for secure transactions, real-time product updates, and effective promotional displays.

PROJECTS

eCommerce Clothes Market — Developed a high-performance eCommerce platform using Next.js, featuring real-time cart management, interactive product galleries, and advanced search & filtering. Integrated Shopify for product data and payment processing, optimizing for performance, SEO, and accessibility. Delivered a production-ready shopping experience with responsive, mobile-first interfaces and dynamic updates.

Socially — Engineered a real-time social media platform with comprehensive features including threaded posts, robust user authentication, dynamic user profiles, and intuitive content creation tools. Designed and built scalable, responsive user interfaces to ensure seamless real-time interactions and an engaging user experience across all devices.

CarHub — Developed a modern car rental showcase platform featuring dynamic search and filtering, interactive car cards with detailed specifications, and real-time vehicle data integration. Implemented key features such as hero sections and rental calculation tools to streamline car discovery and comparison. Optimized for performance, image loading, and seamless user experience across devices, demonstrating a professional, production-ready frontend solution with responsive layouts.
